

I would like to voice my OPPOSITION to the use of cell phones onboard and in flight. My reasons are:

1) I have not been presented with VALID evidence that cell phone use does not interfere with navigational instruments.

2) It is evident that cell phone use WOULD enable terrorists to coordinate a plan of action more effectively by reporting to each other in the same cabin in flight and to those on the ground activities within the cabin.

3) It should not be the role of flight attendants to police the use of cell phones onboard the aircraft for any reason. That is not and should not be a part of their job description.

4) The use of cell phones onboard only intensifies an already stressful environment, especially when individuals may speak in other languages not understood by the people around them.
